

IVO ABOUT THE CTO MISSION IN TBILISI, GEORGIA

Conversation with Ivo de Blaauw | Pediatric Surgeon

[Pediatric surgeon, Ivo de Blaauw, about the CTO mission in Georgia]

[Ivo de Blaauw, Pediatric Surgeon, Nijmegen, Netherlands]

Today's case is a good example of what work we do with CTO. It's a kid with Hirschsprung's disease, operated on for several times, and he needed a third or fourth redo operation. It's a complex case and doing this together with a great team of surgeons, I mean, they are really excellent surgeons from all parts of the world, and a great team of nurses, together with the Georgian staff, is a great honor, a great pleasure. And I think we can have a good outcome for this child. I think there are little children who get this opportunity to be served by this group, and it's a great honor to be part of it.
