

SUPPORT THE LOCALS

Conversation with Jennifer Kondik | Pediatric Nurse

[Nurse anesthetist, Jennifer Kondik, about the CTO mission in Georgia]

[Jennifer Kondik, Nurse Anesthetist, Cincinnati, USA]

My name is Jennifer Kondik. I am a nurse anesthetist at Cincinnati Children's Hospital. I have been with the Colorectal Team Overseas since 2011. I am part of the anesthesia team. CTO is to collaborate with the local anesthesia team and help them with any nuances that are involved with the cases that we do because they're very unique. I help answer any questions, guide them with procedures, and just help with our colorectal surgeons, so that when they come in the room, they know that up until that point, the patients have been prepped and are ready according to our specific specifications. And that just helps things run smoothly up into that point and gets things moving along. Just help facilitate the rooms.
